CUSTOMER Success Story

KAESER COMPRESSORS

*Built for a lifetime.™*

# Kaeser Equipment Built for a Lifetime™

## *Retiring dentist agrees*

**PROBLEM:** In 1967, Philippe Caestecker had just finished his dental studies and was ready to begin his own practice. He needed to purchase a variety of specialized equipment for his business, including a compressor. He knew that a compressor would be vital to keeping his practice running and ensuring the safety and health of his patients.

**SOLUTION:** That same year, Dr. Caestecker bought a Kaeser dental compressor and has continued to use it every day since. Throughout this time, his Kaeser dental unit has never stopped working and has continued to deliver the high quality air he has needed to successfully treat his patients year after year.

**SOLUTION:** Now at the age of 70, Dr. Caestecker is ready to retire, but his compressor isn't ready to quit its day job. For 46 years, little maintenance has been done to the unit and it is still safely running the practice.

We aren't surprised. Kaeser's Dental Compressors combine high performance with low noise and a compact design. Reliable and highly durable, each unit is virtually maintenance-free and provides oil-free air with minimal power consumption. Our unique design gives in-depth protection to your patients as our 100% oil-free design guarantees no contamination to your compressed air.

**Protect your patients with the *built for a lifetime* quality of a Kaeser Dental Compressor.**

**Chances are, you'll be ready to retire long before your compressor.**

# Keep on Smiling with Safe, Reliable Air from Kaeser

**Unlike other dental compressor suppliers,** Kaeser is a compressor manufacturer, not just a packager. That means we design, build, and support the complete unit. With over 50 years' experience in meeting the highest standards of dental professionals around the world, we know our equipment is *Built for a Lifetime.™*

Our Seccomat desiccant dryer removes moisture while the inlet and discharge filtration eliminate harmful particles to provide your patients with the best protection possible.

Heavy duty blocks with durable cast iron cylinders, forged steel connecting rods, and precision machined aluminum pistons with Teflon coated piston rings run at low operating temperatures to increase operational life and keep your practice running.

***Call us today… you'll thank us tomorrow!***

**Kaeser's Dental Compressors combine energy efficiency with low maintenance and high quality compressed air.**
