

Receiving Kaeser Shipments

Do not accept the delivery or let the truck driver leave until you have inspected it.

1. Always inspect the packaging for signs of damage
2. Always remove crating and packaging to inspect the equipment
3. Describe any damage to the package or product on the bill of lading/delivery form
4. If there is damage, the driver should call it in to his office on the spot and provide information for filing the freight claim
5. Have the driver sign next to any notations
6. Keep a copy of the driver's paper work

Once you accept a shipment, you are responsible for repairing any damage you may find.
