FOR IMMEDIATE RELEASE

KAESER ROLLS OUT NEW 185 CFM PORTABLE COMPRESSOR

The new M55PE is packed with features that increase reliability and safety while reducing downtime.

Kaeser's new M55PE Mobilair™ compressor delivers 185 cfm at 100 psig- adjustable up to 125 psig. Built with reliability and durability in mind, these portable compressors are ideal for rental, construction, demolition, sand blasting, repair trucks, and other demanding applications.

The heavy-duty Tier 4 Final D1803CR-T Kubota diesel engine, coupled to the new Sigma 17G airend produces even more air with less horsepower. With its large 21 gallon fuel tank, the M55PE can run fully loaded for 8 hours before refueling.

The convenient eye-level, curbside instrument panel features the Sigma Control Smart electronic controller with intuitive user display, system monitoring and diagnostics. The cold start battery assures year round reliability and Kaeser's anti-frost valve prevents tool freezing.

The powder coated steel chassis is topped with a scratch and dent-resistant polyethylene enclosure with wide-opening gull wing doors for easy access to maintenance points. The new spin-on air/oil separator greatly simplifies maintenance and reduces overall weight.

On the road, torsion bar suspension, larger wheels and tires, and LED lighting package ensure excellent handling and safety. For more information, visit us.kaeser.com/mobilair. For more information or to be connected with your local authorized Kaeser representative, please call (877) 417-3527
