FOR IMMEDIATE RELEASE

## NEW MOBILAIR M118

**The new Mobilair™ M118 portable compressor delivers up to 405 cfm at 100 psig and reliable, fuel efficient performance year after year.**

Kaeser Compressors' new M118 comes standard with the power-saving Sigma Profile™ rotary screw airend and heavy-duty Tier 4 Final 4-cylinder Deutz diesel engine. The onboard Sigma Control Mobil™ controller enables variable pressure ranges between 87 and 145 psig to tackle the different pressures needed for powering breakers, cable blowing, and even high pressure applications like drilling. The Selective Catalytic Reduction system along with the Diesel Particulate Filter protects air quality and meets even the most stringent emission requirements. Plus, the optional clean air treatment packages make the M118 an excellent choice for sandblasting and back-up plant air.

The fully weatherproofed polyethylene canopy protects internal components and wide-opening gull wing doors allow quick access to all components for easy servicing and also reduce noise levels. The steel chassis, torsion bar suspension, oversized tires, and instrument and light package ensure easy portability and excellent road handling, while the high capacity, cold start battery assures year round reliability in temperatures from 14 to 113°F.
