

*Work.  
Cruise.  
Relax.*

## Lifelong Texan

Aaron Kaufman's fascination with machines began at an early age. Dump trucks, bulldozers, tractors, you name it — if it made noise and did work, Aaron was curious about it.

As he began to drive, Aaron realized his passion for the automobile as a machine of freedom and expression. Early in his career as an auto customizer, he knew that this was not a job, rather a craft and a way of life.

Much of the road to here has not been exciting or glamorous for Aaron...However there have been some bright spots while at Gas Monkey Garage, a Dallas based hotrod shop.

Possibly the brightest spot was Aaron's tenure on the hit television show "Fast 'n Loud" where under extreme deadlines, Aaron and his crew built ever increasingly complicated hot rods, racecars, and show cars. This gave him an opportunity to explore building styles and techniques that would have otherwise taken decades to amass.

This experience and Aaron's natural love for trucks and for Ford has culminated in this latest adventure: patching a hole in the aftermarket for Ford's F-100 line of trucks. Come what may, Aaron and his crew are ready to take on this new challenge and learn even more along the way.

*Aaron's new shop has 2 Kaeser SM 10Ts with integrated dryers and 240 gallons of storage to feed all of his tools and equipment with clean, dry air at a stable pressure.*

# Industrial Quality for Your Shop

*AIRCENTER Series  
5 to 20 hp*

*AIRTOWER Series  
5 to 7.5 hp*

If you are like most air compressor owners, you need a reliable source of clean, dry air that you do not have to think about on a daily basis. You have enough to do without designing and then installing a new compressed air system.

AIRTOWERS and AIRCENTERS combine the reliability, energy efficiency and easy-to-service design of our industrial rotary screw compressors with a storage tank and dryer. They are completely assembled and their compact design saves you precious floor space. They arrive ready for installation, saving you a lot time and expense. The small footprint and super-quiet operation let you place the system almost anywhere.

## KAESER COMPRESSORS

*Built for a lifetime.™*
